

## POWER IN AN EXTRA LARGE SIZE

## The scrubbing machine that changes the user experience from the very first glance

The shape of the machine inspires a sense of safety and control, thanks to the harmonious and balanced design that promises a user experience that is out of the ordinary.

MxL has the power you need to work in any environment and under the most difficult conditions, as a result of its careful design, which combines high-performance components with the most advanced technology. As soon as you turn it on, you can feel the value of a machine created to enhance the professional results of every cleaning operation, with innovative features that provide operators with all the tools necessary to successfully complete their work.

## Its robust design is not afraid of any environment

The wrap-around lines delineate an enveloping structure made from polyethylene, which protects the heart of the machine and enhances its robust appearance

The brush head and the squeegee are made from aluminum, a material chosen for its durability and reliability over time as well as for its lightness, to provide you with better manoeuvrability and comfort

## MxL gives more value to your time: it reduces downtimes and increases productivity

#### ACCESSORY STORAGE COMPARTMENT

The operator can work in absolute tranquility in the knowledge that when he needs them, all the accessories are close at hand, and once finished with, these can easily be placed back in their compartment, allowing the cleaning operation to proceed without long interruptions and wasted time.

#### QUIET OPERATIONS

 $\mathbf{X}$ 

With the Eco Mode and FNC technologies that lower the noise level, MxL safeguards the health of the operator and that of the people in the environment where it is used

EASY MAINTENANCE - COLOR CODED PARTS Parts which must be cleaned at the end of every shift are color coded in yellow. Regular maintenance of these parts ensures the correct operation of the machine, along with consistent performance

FFF – FIMAP FAST FILL Automatic system for filling the fresh water tank, lets the operator perform other activities while the tank quickly fills up

#### NO TRAINING

No doubt will keep you from your work. The integrated video tutorials on the display demonstrate how to perform routine and extraordinary maintenance, to prevent uncertainty and wasted time

The spray gun has a dual role. During machine maintenance, it facilitates the rinsing of the tanks at the end of the shift, but it can also be used during the work, to moisten stubborn dirt stains and make them easier to remove

# Powerful and versatile, it is always ready to meet your goals

#### **POWER MODE**

When performing localized heavy duty cleaning, pressing the Power mode function activates a work mode that uses all the scrubbing parameters to the maximum, for a short period of time. This enables the machine to act with greater force on a specific area just for the time needed, without wasting resources and having to resort to passing over the area more than once.

**Consistent cleaning results** Pressure on the brushes is kept constant, delivering consistent high cleaning results on any type of flooring

FLR-FIMAP LONG RANGE Increases productivity by up to 70%

No risk of slipping The powerful 3-stage vacuum motor leaves the floor immediately dry and safe

Great autonomy Work for up to 5 hours non-stop

### VACUUM WAND

Vacuum wand allows to clean areas that are out of reach of the machine and successfully fulfill the task

## Equipped to give you safety and protection

The equipment on the MxL prevents accidents, increases safety while working and supports the operator at all times, so that everything is always under control, without ever encountering difficulties.

### **ACTIVE TECHNOLOGIES to prevent accidents**

## PASSIVE SYSTEMS to help the operator in case of emergency

Reduces time to service in case of emergency. The red button sends an SMS alert to receive prompt help, reducing downtimes

SOS DEVICE

By pressing a single button the machine stops immediately

EMERGENCY STOP

## Keep tabs on your machines remotely when you want and from wherever you want!

Developing new technology to improve efficiency is one of the core missions of Fimap.

An example of this is FFM, the Fimap Fleet Management system which collects the data sent by the machines and transforms it into valuable information accessible to you easily in real time, 24/7, from your smartphone, through the app My.Machine.

Being constantly connected to your machines will help you operate them even more efficiently and effectively. My.Machine lets you know where the machines are, if the operation is being carried out according to plans and at the scheduled time. The machine's health status is constantly monitored. In the very unlikely event of a breakdown, you'll receive an alert notification directly on your smartphone, allowing you to take action promptly and immediately call the technical support.

You can check the battery conditions and the quality of the charges in order to optimize battery endurance and life cycle.

**GEOLOCALISATION** 

USAGE INFORMATION

**HEALTH STATUS** 

ENVIRONMENTAL IMPACT

You know where your machines are

You know how your machines are used

You know the health status of machines and batteries You can check the machine consumption per intervention

## Protect the environment with efficient management of resources

With better management of resources, you can clean more sq.m with the same levels of consumption, avoiding waste. Fimap technologies optimize the use of water, detergent and energy to protect the environment and reduce the cost of cleaning per sq.m.

The Eco Mode function helps prevent water, detergent and energy consumption by using only the quantities you need and nothing more

When the machine is idle, the brush motor, the vacuum motor\*, the traction and the water flow will turn off automatically, reducing costs and emissions. All the functions are reactivated automatically when the operator presence control is operated.

WATER

FLR-FIMAP LONG RANGE

Reduces water and detergent consumption per cleaning operation by up to 66%\* This is a system which recycles detergent solution to increase autonomy: to scrub more sq.m. while using less resources

**FSS-FIMAP SOLUTION SAVER** Water and detergent quantities are separately dosed, reducing consumption by up to 50%

FWF-FIMAP WATER FLOW Ensures uniform cleaning results across the entire working width on the first pass, optimizing detergent solution consumption

**X** 

ENERGY

FES-FIMAP ENERGY SAVER Reduces energy consumption by up to 35%

LED TECHNOLOGY

Up to 80% lower energy consumption than conventional headlights. The LED headlights consume much less energy than conventional headlights, offer a longer lifespan and illuminate with a brilliant white light similar to natural daylight

FNC-FIMAP NOISE CANCELLING Reduces sound pressure

## Make it perfect for you: configure it with the characteristics that are ideal for your needs

## Choose your machine

DISC with 2 disc brushes or 2 pad holders CYLINDRICAL with 2 cylindrical brushes and a debris hopper for small sized solid debris

#### MxL DISC

The brush head with disc brushes is the most versatile option, as this can adapt to all types of hard floors, both smooth and irregular, in any environment. The force of the two brushes easily removes even stubborn dirt.

#### MxL CYLINDRICAL

The brush head with cylindrical brushes combines the scrubbing action with a sweeping action, which reduces the operation time when it comes to cleaning floors on which small solid residues are present, avoiding the need to sweep before scrubbing. The residues are collected in a drawer installed at the rear of the brush head, which is removable for emptying.

With flexible equipment options, you can configure it in the most convenient and beneficial way for you

Your best investment in cleaning

#### FIMAP INTELLIGENCE

Using powerful software, unique of its kind, and on-site advice, Fimap supports you in choosing the ideal model and its optimum configuration, according to the type of environment to be cleaned and your requirements.

#### The service package that gives you more of what you need for less than you think! We want you to deal only with your work, leave everything else to Fimap Life!

#### FIMAP FINANCE

Fimap offers various financial solutions that can be adapted perfectly to your business.

#### FIMAP MAINTENANCE

With Fimap Maintenance you will not have to worry about maintenance of the product: your Fimap machines will always be as new and ready for use. Choose from the three Service Packs offered – Light, Smart or Full - to suit the needs of your job.

Fimap Fleet Management (FFM) service transforms the data received from the machines into information that is essential to improve the performance and productivity of the fleet. Through the app My.Machine it provides a comprehensive overview of the machines in use, helping you to reduce costs and optimize cleaning times.

Fimap is always there for you: our global network of certified dealers guarantees a rapid response support service wherever you are.

CERTIFICATIONS

n a market that is becoming more and more competitive, Fimap offers a new support service for cleaning contractors, a growth opportunity for the professionals of today and tomorrow. Finis dedicated training program addresses various subjects that are relevant for the daily requirements of customers.
